PRESIDENT'S MESSAGE

**Dear Esteemed Members,
Partners, Colleagues,**

It is my great pleasure to meet you once again, this time through our semiannual activity report.

To ensure that we stay in touch with our esteemed members and partners, we started launching EURAS Annual and Semiannual Reports, which summarize the union's achievements in the past months, starting with the success of EURIE 2020 Summit and the series of EURAS E-Talks and EURAS webinars delivered by valuable professors from different parts of the world. Despite the sudden change in our daily life and the challenges we now face, we remain resolutely focused on our core goals; to promote sustainable peace and advanced technology worldwide through the development of culture and

new educational systems; to open the borders of education to the public and to favor the exchange of knowledge and best practices among higher education institutions from the entire Eurasian region.

I extend my gratitude for your effective and active participation on our previous EURAS Activities, and I hope you enjoyed and benefited from them as much as we did. I also encourage those who did not have the chance to join the previous online activities to register and participate on the upcoming ones.

As always, we aim to provide services and support for all our members and will continue to do so in the following years as well with all your contributions.

Assoc. Prof. Mustafa AYDIN

The onset of systemic activities has softened the effectiveness and continuous effects of the onset of COVID-19. However, the pandemic has effectively changed the academic scenario in one global way, which eventually leads to the process of re-structuring higher education. Malaysia has among the first countries to start digital engagement after the announcement of the movement control order (MCO) in March 2020 by the government. Coursera's Technology Platform (CTP) in partnership has implemented various levels of engagement to return the curriculum of each student's education and also build connections with LPM partners, which will be shared in this talk. Consequently, it is clear that the higher education sector has done tremendous work in providing a future where students can thrive and support digitally, without compromising academic quality and standards of the institution.
