EURAS WEEKLY NEWS

NEWS AND ANNOUNCEMENT

❖ **Mustafa(PBUH) Science and Technology Foundation (MSTF), a member of EURAS intends to hold the 3rd KANS Scientific Competition in 2023.**

This event aims at finding the best scientific solutions to spot and tackle the challenges of society. Due to this purpose, a novel formation is designed for the upcoming event, in which pavilions would be the core of the event.

The competition is held in 6 main subjects including;

1. Energy, Water & Environment.
2. Health & Med-tech.
3. ICT & AI.
4. Electronics, and Robotics.
5. Agriculture and Food Industries.
6. Mining and Mineral Industries.

KANS Scientific Competition after holding two rounds and the participation of more than 1000 innovators from over 25 countries, in its third round in 2023 calls for young university students, researchers, technologists, and scholars to solve Islamic world challenges in 6 defined areas.

Young scholars can participate in this competition by submitting their scientific achievements or their innovative solutions for challenges declared by international scientific institutions. Scientific achievements and solutions, in the form of 3 to 5 minute videos, should be uploaded on the competition website kans.mstfdn.org.

In the videos, participants describe a summary of their scientific achievements and suggested solutions. Scientific achievements and solutions could be presented in the form of Idea, Paper, Book, Prototype, MVP, or New product.

The 6 winners will be awarded:

- KANS Medal and Plaque of Appreciation.
- 30-gram Gold Insignia.
- Special privileges for benefiting from MSTF networking platforms as well as Young Scientists Fellowship Program (YSFP) worth \$2000.

Submission deadline: **January 20th, 2023.**

For more information, please visit the website: KANS@mstfdn.org or kans.mstfdn.org

EURAS Bulletin Vol.4 No.11
