❖ **I. International Conference on Data Management, Digitization, and Economic Practices in Preserving and Promoting Cultural Heritage (DEPCH2023) on June 3rd, 2023. (online).**

This conference is based on the outcomes of the webinar named Data Management & Current Simulation Practices in Cultural Heritage Researches (DMCSPCH) on January 24th, 2022. Starting from founding conference 2023, it will be held in order to present academic studies on cultural assets in the international sense. İstanbul Aydın University will be the host of the conference. Researchers, academicians (from engineering, archaeology, communications fields) professionals, museum experts from fields related with cultural heritage, museum and their assets or people who works in different areas in terms of multidisciplinary connection with the context are all welcome. This is the founding conference and will be held once in every 2 years.

Topic Suggestions
• 3D Data Management and 3D Technologies on Web
• Virtual Museum and 3D Scanning Systems
• VR, AR, XR & MR Applications
• NFT Studies and Cloud Service Operands
• Marketing Practices of Cultural Heritage Through New Media
• Social Media Strategies of Museums
• Current Preservation Techniques Developed Using 3D Systems
• Interactive Cultural Assets Supported by Real-Time Simulation Systems & Games

❖ **NAFSA: IE Competencies 2.0: Leadership, Inclusion & Equity, and People Development**

In the first session of the IE Competencies 2.0 series, panelists will highlight the competencies of Leadership, Inclusion & Equity, and People Development. Come learn from your peers and discuss with your colleagues topics including developing strategies to reach personal/team goals and objectives, championing organizational policies and practices to advocate for DEI on campus, and fostering and encouraging professional/career growth among colleagues, peers, and staff.

Refreshed in 2022, the NAFSA International Education Professional Competencies 2.0 advance the professionalization of the field and influence the development of the future international education workforce. As a reminder, the competencies should be viewed as a whole and not individually, as each competency necessarily supports the others. Throughout 2023, NAFSA will host four live sessions featuring conversations around interrelated subsets of the updated competencies. International educators at all career levels and across all sectors of the field are invited to join these conversations.

Learning objectives:
• Understand how the NAFSA International Education Professional Competencies 2.0 can be used in daily work
• Use the competencies for professional development, career advancement, and staff retention
• Learn how each competency is interconnected
